*We're more than happy to cater to you to make your wedding day memorable for years to come. These packages are a guide. A starting place. If there's something missing, something extra, we'll work with you to make it perfect.*

Preparation. Pre-ceremony excitement. Your eyes meet. The exchanging of vows. The kiss. Celebrate together.

## Your story.

*Each wedding album is custom designed and tailored to capture your day and personality. To give you the best options, our albums are decidedly flexible. But this also makes choosing and pricing admittedly difficult. This page is to help sort through what is important to you so you can select the album that fits.*

We have two main types of albums: hardback and leather. **And there are two main shapes: square and rectangular.** Add-ons and upgrades are available to any package. Mix and match types and sizes. Once we have the design, they convert well to either hardback or leather, and are scalable up and down. This way, you can get the albums you want, for the people you want.

Take a look at the ZookBinder Bride Catalog for nomenclature. One thing to note is that a page has two sides in their terminology. So 15 pages is equivalent to 30 sides.
